The Osterweis Funds are available by prospectus only. The Funds' investment objectives, risks, charges and expenses must be considered carefully before investing. The summary and statutory prospectuses contain this and other important information about the Funds. You may obtain a summary or statutory prospectus by calling toll free at (866) 236-0050, or by visiting www.osterweis.com/statpro. Please read the prospectus carefully before investing to ensure the Fund is appropriate for your goals and risk tolerance. **Mutual fund investing involves risk. Principal loss is possible. The Osterweis Strategic Income Fund may invest in debt securities that are un-rated or rated below investment grade. Lower-rated securities may present an increased possibility of default, price volatility or illiquidity compared to higher-rated securities. The Fund may invest in foreign and emerging market securities, which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks may increase for emerging markets. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Small- and mid-capitalization companies tend to have limited liquidity and greater price volatility than large-capitalization companies. Higher turnover rates may result in increased transaction costs, which could impact performance. From time to time, the Fund may have concentrated positions in one or more sectors subjecting the Fund to sector emphasis risk. The Fund may invest in municipal securities which are subject to the risk of default.** Standard Deviation (Annualized): This measure of dispersion represents the degree to which an investment's returns vary around a mean. The greater the Standard Deviation, the more volatile an investment's returns were during the period measured. Investment grade and non-investment grade (high yield) categories are determined by credit ratings from Standard and Poor's and Moody's, which are private independent rating services that assign grades to bonds to represent their credit quality. The issues are evaluated based on such factors as the bond issuer's financial strength, or its ability to pay a bond's principal and interest in a timely fashion. Standard and Poor's ratings are expressed as letters ranging from 'AAA', which is the highest grade, to 'D', which is the lowest grade. Moody's ratings are expressed as letters and numbers ranging from 'Aaa', which is the highest grade, to 'C', which is the lowest grade. A Standard and Poor's rating of BBB- or higher is considered investment grade. A Moody's rating of Baa3 or higher is considered investment grade. A Standard and Poor's rating below BBB- is considered non-investment grade. A Moody's rating below Baa3 is considered non-investment grade. If an issue is rated by both agencies, the lower rating is used to determine the sector. Fund breakdown by credit ratings are based on Standard and Poor's ratings. Not Rated Securities consists of securities not rated by either agency, including common stocks, if any. While the fund is no-load, management fees and other expenses still apply. Please refer to the prospectus for more information. Fund holdings and/or sector allocations are subject to change at any time and are not recommendations to buy or sell any security.
